QuickMAR
by **PointClickCare®**

A Complete Medication Management Solution for Residential Group Homes and Adult Foster Care

QuickMAR connects your organization to your pharmacy partner, simplifying the entire medication management process, from receiving orders to, passing medications to, reordering and managing inventory. QuickMAR also gives clinical staff real-time visibility into MARs and other important safety indicators across all locations.

Easier for Staff, Safer for Residents

- Document med administration with a few clicks
- Inform staff when residents' meds change
- Eliminate missed meds with proactive alerts
- Record witness signature during administration
- Simplify documentation for state audits
- Oversee administration across multiple locations with real-time dashboards
- Standardize procedures across locations

Your Pharmacy Becomes an Extension of Your Operation

- Streamline communication with your pharmacy – no more faxing or phone tag
- Improve accuracy by having med orders flow directly from your pharmacy into your eMAR
- Receive and inventory medications in minutes, not hours
- Re-order medications and other supplies with ease
- Eliminate drug diversion by tracking the handling of controlled substances

Benefits to Your Organization

Ease of Use

QuickMAR is intuitive and easy to use for staff at all levels of your organization. This helps minimize training time and improve compliance with your procedures.
Resident Safety

Reduces human error by helping staff ensure that they are following the "Rights of Administration" and helps supervisors identify mistakes when they occur.

Reliability

MedAssure™, QuickMAR's industry leading off-line capability, enables staff to pass meds and document administration even when the Internet is temporarily unavailable, up to seven days.

Versatility

Shares data with PointClickCare clinical applications that can help your organization manage assessments, care plans, infection control, and more.

> Before we rolled out QuickMAR, MARs were stored in binders at each home and our nurses had no access until they visited a site. Now with QuickMAR, they can access MARs, review medication changes, and approve new orders anytime, anywhere.
